

Dream bedroom

By Demarcus

This is a future/dream bedroom. This future bedroom is built inside of the wall. It has one big row of six lights on the ceiling. You stick your head out of the bed you will see the living room. It has a zig-zag design on the ceiling of the bed. It has two televisions on one side of the bed's wall. On the other side of the bed is a bunch of pillows for you to sleep on or watch television while you are lying down. Also if you stick your head out of the bed you will see the television and the bright lights. It is built into a wood wall. The lights on the ceiling shine on the bed making the bed very bright.
